Investment strategy

The investment strategy focusses on companies that are cheap in the market and are characterized by strong fundamentals and stable historical business performance. The portfolio is oriented towards historically cheap stock markets and industries. All companies in the portfolio are cheap in terms of traditional valuation criteria such as price-to-book and price-to-earnings. Fundamentals are quantified in terms of traditional criteria such as solvency, liquidity and profitability. The portfolio is invariably invested in the three major geographic areas (America, Europe and Asia), is diversified across industries and is spread over large cap, mid cap and small cap companies. The weights of stock market indexes such as the MSCI World are not handled as benchmark. The equity portfolio consists of between 25 and 40 individual positions.
